

Antipollution check valve BA
flanged

PN16

WATER

Na zdjęciu DN80

Product description (standard execution):

- Two closing devices with intermediate chamber to separate inflow from outflow zone
- No hydraulic impacts
- Low medium resistance – smooth surfaces
- High and low pressure tightness
- Silent working - compact design
- Pressure changes insensitivity
- Repair and maintenance without dismounting from installation
- Access eye to check closing tightness and water sampling. Additional hole for vertical drainage system.
- Body bonnet Zinc coated screws protected by wax
- Epoxy coating minimum 250 microns according to EN 14091
- Article according to EN 1717; EN 12729
- Flange connection according to EN 1092-2 (DIN2501) pressure PN10; PN16
- Article marking according to EN 19; EN 1074

Application:

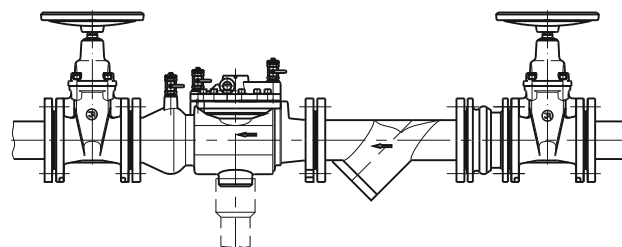

Water lines networks; potable water back flow protection. Max. working pressure 1.6MPa and temp. up to +70°C

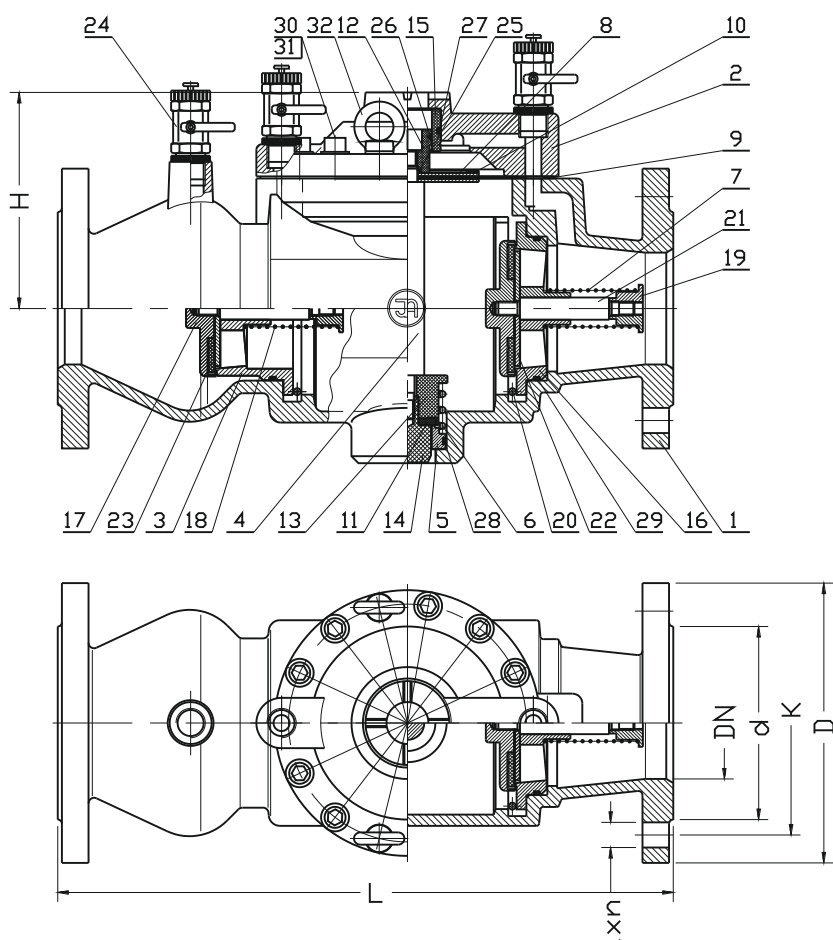

Test control:

Water pressure test according to EN 1074-1; EN 1074-2; EN 12266-1
Seat: 1,1 x PN
Body: 1,5 x PN

Installation:

According to below scheme

* Implementation
